D3.5 Developed Teaching Materials

"D3.5 Developed Teaching Materials" contains teaching materials in the form of presentations created specifically for developed short study programs in the field of information technologies and multimedia. All WB HEIs (University of Mitrovica - UPKM; Academy of Vocational Studies of Kosovsko Metohija, Leposavić - AASKM; University of Herzegovina - SVEHERC; University of Bihać - UNBI) prepared teaching materials with the assistance of EU HEIs. The developed teaching materials will be used for the implementation of short study programs. They do not represent the only material for the courses because for each subject there is also basic literature in the form of textbooks.

The developed teaching material is publicly available on the project website on the link <https://wbnet.atuss.edu.rs/teaching-materials/>. The material is available in the local (Serbian / Croatian / Bosnian) language. All materials in the form of presentations were made in the same template, on each material there is the logo of the WBNET project and the logo of Co-funded by the European Union, while on the cover and last page (slide) there is the name and number of the project as well as the disclaimer *"Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union. Neither the European Union nor the granting authority can be held responsible for them."*.

Part of the material was jointly developed by several WB HEIs, bearing in mind that some subjects are the same in short study programs at several WB HEIs.

Table 1 and Table 2 provide links to teaching materials created for subjects for the short study program in the field of information technology and multimedia, respectively.
